Projects

Fantail Games Mixed Reality Minigames 2025 group project

This industry brief was pitched again by Steven Linton and I couldn't pass up the opportunity to work on such an exciting project again with my newfound skillset and ability.

What I learned from the project so far

- Using hand tracking to make custom gestures.
- Performance consideration when developing for this medium.
- Developing with feel at the forefront.

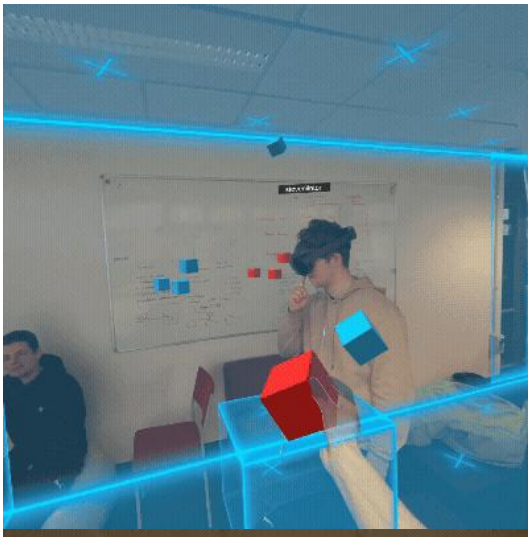

Fantail Games Mixed Reality Minigames 2024 group project

This was an industry brief from Fantail Game that I worked on with a group to come up and create minigames to add to their existing game "Game Night"

What I learned from this project

- Working with meta-SDK's.
- Mixed reality development.

- App deployment pipeline.

Runaway Play Forest and Fields prototype group project

This was an industry brief from Runaway Play that I worked on with a group to bring to life their vision of the simple childhood game dots and boxes to create custom and unique environments with each line placed rewilding stark empty environments.

What I learned from this project

- AI using the minimax algorithm.
- UI and logic for difficulty system.
- Working closely with stakeholders.

Goblins Gauntlet VR Escape room solo project

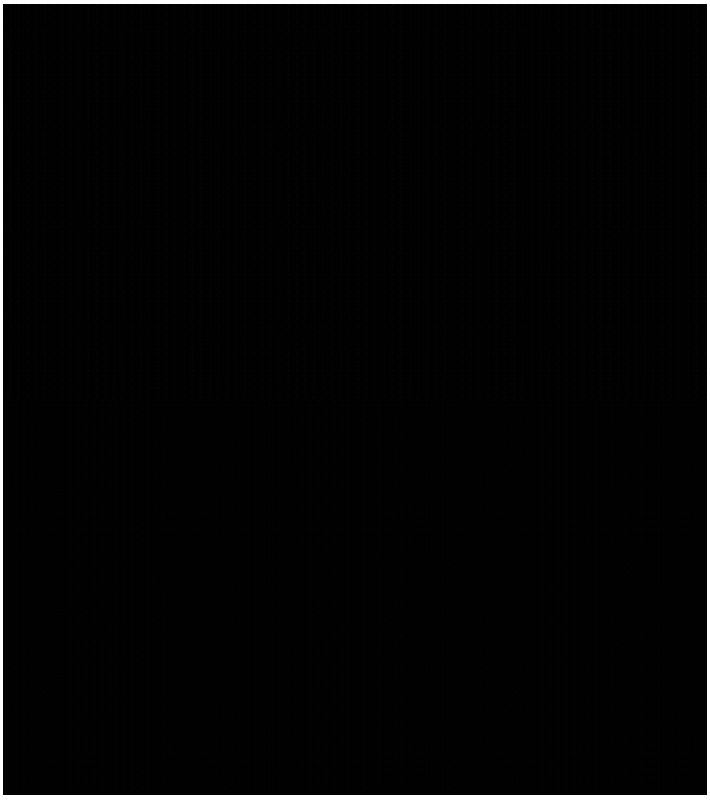

[Goblins Gauntlet by StretchCaleb101]

Trapped in a goblin storeroom, your only path to freedom lies in uncovering the hidden tools and magic within. Escape and continue your adventure across the land.

This was my first time working with VR in Unity.

What I learned from the project

- Implementing puzzle mechanics within VR.
- Completing a fully immersive experience.
- XR Interaction toolkit.

The Mines Gauntlet Run solo project

An immersive Indiana jones and the temple of doom mine chase inspired experience.

This was my first large project in unreal engine.

What I learned from the project

- Unreal engine modeling toolkit.
- Level design guiding the player without UI.
- Manipulating splines.

Sincerely,

Caleb Gourley
